

STAGE 4 TECHNOLOGY MANDATORY

Desk Tidy | 25-period teaching program

Materials and production processes | Teacher review copy v1.2

Course	Stage 4 Technology Mandatory	Syllabus	Technology 7-8 Syllabus (2023)
Delivery	10 weeks 25 x 60-minute periods	Pattern	5 periods per fortnight
Lesson balance	5 theory 5 project/folio 15 practical	Focus	Materials and production processes
Status	Local teacher review only	Use	2027 delivery

Website coverage: all 15 named theory sections, 150 knowledge checks and 20 scaffolded responses are scheduled. Current project assessment remains 60% practical | 20% safety/OnGuard | 20% folio.

Stage 4 outcomes

Outcome	Official wording
TE4-SDP-01	explains relationships between sustainability, design and production
TE4-PDP-01	describes the practices and processes of designers and producers
TE4-MSC-01	explains how materials, systems and components contribute to solutions
TE4-PPM-01	applies processes in the planning, management and production of projects
TE4-DES-01	communicates and evaluates design ideas and solutions
TE4-SAF-01	selects and safely uses tools, materials, technologies and processes

Teacher-to-confirm register

When	Decision needed	Confirm by
Before the unit	Assessment notice, dates, OnGuard links, class supports and adjustments	Teacher / faculty
Before practical work	Current induction, PPE, tools, supervision and local risk controls	Teacher / faculty
Before production	Approved project drawing, component dimensions, joint choices and variations	Teacher / faculty
Before finishing	Product instructions, SDS, finishing area, drying and storage arrangements	Teacher / faculty
Before submission	Due date, submission method and presentation arrangements	Teacher / faculty

Teaching program | Periods 1-10

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
1	Site/theory	Design brief and user need	Module 1 — Designing for an organised workspace: learn the section, complete its 10 checks, then set the need and criteria.	Factors affecting design; document design processes	10 checks + brief/criteria TE4-PDP-01, TE4-DES-01
2	Site/theory	Safety, materials and sustainability	Module 1 — Hazards, risks and controls: learn the section, complete its 10 checks and safety response, then assigned OnGuard work.	Material properties; sustainable sourcing	10 checks + safety response TE4-SAF-01, TE4-MSC-01, TE4-SDP-01
3	Practical	Material and tool sampling	Module 1 — Choosing materials responsibly: complete its 10 checks, then test approved samples and record properties.	Develop practical skills; demonstrate safe practice	10 checks + sample record TE4-MSC-01, TE4-SAF-01
4	Practical	Induction and demonstration	Complete induction; identify controls in the practice-slat demonstration.	Safe use of tools, materials and processes	Induction and OnGuard check TE4-SAF-01, TE4-PDP-01
5	Practical	Practice slat	Make the 200 x 20 x 10 mm practice slat; check accuracy.	Develop practical skills; test processes	Practice-slat check TE4-SAF-01, TE4-PPM-01
6	Site/theory	Research existing organisers	Module 2 — Researching organisers and generating four concepts: complete its 10 checks, then research two organisers.	Factors affecting design; designer practice	10 checks + research notes TE4-PDP-01, TE4-MSC-01
7	Project/folio	Develop four concepts	Draw four different annotated concepts with approximate sizes.	Sketch and annotate design ideas	Four concepts TE4-DES-01, TE4-PDP-01
8	Site/theory	Compare and select	Module 2 — Comparing concepts: complete its 10 checks, then use the matrix to justify and refine the preferred design.	Assess ideas; evaluate quality	10 checks + matrix TE4-DES-01, TE4-SDP-01
9	Project/folio	Respectful design research	Module 2 — Learning respectfully from Aboriginal and Torres Strait Islander design knowledge: complete its 10 checks and cultural-safety response.	Aboriginal and Torres Strait Islander Peoples' products and systems; sustainable sourcing	10 checks + cultural response TE4-SDP-01, TE4-PDP-01
10	Practical	Joint samples and approval	Practise approved joints on off-cuts; compare quality and gain design approval.	Justify tools, materials and techniques	Joint sample and approval TE4-MSC-01, TE4-SAF-01, TE4-DES-01

Teacher to confirm: assessment notice, OnGuard work and practical controls; approve the design and joint choices before Period 10.

Teaching program | Periods 11-20

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
11	Site/theory	Orthographic drawing	Module 3 — Working drawings: complete the section's 10 checks, then draw approved 1:10 orthographic views.	Sketch, draw and annotate solutions	10 checks + drawing TE4-DES-01, TE4-PPM-01
12	Project/folio	Isometric and cutting list	Module 3 — Cutting lists and a production schedule: complete its 10 checks, then prepare the isometric and cutting list.	Draw solutions; document design	10 checks + cutting list TE4-DES-01, TE4-PPM-01
13	Project/folio	Production schedule	Use the Module 3 scaffold to finish a realistic production schedule with safety and quality checks.	Plan and manage production; document design	Schedule response TE4-PPM-01, TE4-PDP-01
14	Practical	Datum marking-out	Module 3 — Datums and accurate marking out: complete its 10 checks, then mark from one datum.	Select processes; demonstrate safe practice	10 checks + mark-out TE4-PPM-01, TE4-SAF-01
15	Practical	Complete marking-out	Complete marking out; pair parts and recheck dimensions.	Select processes; test accuracy	Component check TE4-PPM-01, TE4-SAF-01
16	Practical	Cut components	Module 4 — Cutting and shaping accurately: complete its 10 checks before tools are issued, then begin approved cutting.	Develop practical skills; demonstrate safe practice	10 checks + cutting accuracy TE4-SAF-01, TE4-PPM-01
17	Practical	Shape and refine	Shape and refine matching parts; recheck dimensions.	Production techniques and solution quality	Shaped-component check TE4-MSC-01, TE4-SAF-01
18	Practical	Prepare joints and drilling	Module 4 — Butt, rebate and dowel joints: complete its 10 checks, then prepare only the approved joints and drilling.	Select processes; demonstrate safe practice	10 checks + joint check TE4-MSC-01, TE4-SAF-01, TE4-PPM-01
19	Practical	Dry fit	Module 4 — Dry fitting, PVA assembly and surface preparation: complete its 10 checks, then dry fit and record faults.	Test, modify and improve quality	10 checks + dry-fit record TE4-MSC-01, TE4-PPM-01
20	Practical	Refine the fit	Make approved adjustments; recheck the full assembly.	Test, modify and evaluate quality	Approved final dry fit TE4-DES-01, TE4-PPM-01, TE4-SAF-01

Teacher to confirm: drawing, dimensions, cutting list, tools, supervision and local risk controls before production.

Teaching program | Periods 21-25

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
21	Practical	Glue and clamp	Apply PVA, assemble and clamp as demonstrated.	Develop practical skills; document design	Assembly record TE4-SAF-01, TE4-PPM-01
22	Practical	Surface preparation	Sand 80, 120 then 240 grit; inspect glue, edges and surface.	Production techniques and solution quality	Surface check TE4-MSC-01, TE4-SAF-01
23	Practical	Apply clear finish	Module 5 — Applying a clear finish: complete its 10 checks, then apply one approved coat under current controls.	Develop practical skills; demonstrate safe practice	10 checks + finish record TE4-SAF-01, TE4-PPM-01
24	Practical	Functional testing	Module 5 — Functional testing: complete its 10 checks, then test storage and stability against the criteria.	Test and improve; evaluate quality	10 checks + functional test TE4-DES-01, TE4-SDP-01, TE4-PPM-01
25	Project/folio	Evaluate and present	Module 5 — Evaluation, presentation and reflection: complete its 10 checks and scaffolded evaluation; present improvements.	Evaluate using written, visual, verbal or multimodal forms	10 checks + evaluation TE4-DES-01, TE4-SDP-01, TE4-PDP-01

Teacher to confirm: practical controls, finish product instructions and area, submission, presentation and adjustment arrangements.

Evidence, feedback and support

Evidence	Look for	Respond / support
Website theory and checks	Named section completed; quiz responses show understanding	Return to missed items; use the scaffolded response before rechecking
Folio and planning	Clear decisions, drawings and manageable production steps	Conference against the brief; set one specific next action
Practical observation	Safety, accuracy, workflow, quality and clean-down	Pause, demonstrate, practise on off-cuts and recheck
Product and evaluation	Functional tests and evidence-based judgement	Compare the result directly with the original criteria

Support: use visual steps, demonstrations, word banks, chunked instructions, accessible practical roles and approved ways to record evidence.

Practical controls: the project unit controls the sequence; current school induction, PPE, tool approvals, supervision, risk controls, SDS and product instructions control delivery.
